KEY ACHIEVEMENTS

- Certified AI Engineer & Architect**
Earned Microsoft Azure AI Engineer Associate (AI-102) and Anthropic Claude Certified Architect, plus MCP, subagents, and agent-skills credentials.
- AI-Augmented Delivery at Scale**
Drove adoption of Claude Code, GitHub Copilot, and Cursor across a 20-person delivery team.
- Enterprise Drupal Platform Lead**
Led 20-person dev team delivering Drupal 8–11 multi-site estate for a multinational healthcare client at EPAM.
- React/Next.js Design System**
Built shared component library using Figma, Storybook & Style Dictionary; atomic design + design tokens across multi-site estate.
- 30% Fewer Regression Incidents**
Introduced CI/CD tooling and Capistrano automation achieving zero-downtime releases.
- 50+ Projects Delivered**
Led full-stack delivery of 50+ web projects across e-commerce, corporate, and media verticals at [empty] Studio.
- 80%+ Unit Test Coverage**
Introduced PHPUnit and PHP Code Sniffer enforcement, raising core-module coverage to 80%+.

CERTIFICATIONS

YEVHEN KYVHYLA

LEAD SOFTWARE ENGINEER & AI-AUGMENTED TECH LEAD

Azure AI (AI-102) · Anthropic Claude · Generative & Agentic AI · Full-Stack (Drupal / Laravel / React)

SUMMARY

Lead software engineer with 19+ years building and shipping production web systems at enterprise scale, now focused on bringing AI into the core of how software is designed, built, and delivered. Currently Lead Software Engineer at EPAM Systems, leading a 20-person team within a 47-member delivery org on a Drupal 8–11 multi-site platform for a multinational healthcare client, and owning a React/Next.js Design System built with Figma, Storybook, and Style Dictionary. Microsoft Certified Azure AI Engineer Associate (AI-102) and Anthropic Claude Certified Architect, with hands-on experience in generative AI application development, agentic systems (Model Context Protocol, subagents, agent skills), prompt engineering, and Azure AI services. Drives AI-assisted engineering adoption across the delivery team—Claude Code, GitHub Copilot, and Cursor—pairing deep full-stack expertise (Drupal, Laravel, PHP, React/Next.js) with modern AI tooling to raise delivery speed and code quality.

PROFESSIONAL EXPERIENCE

EPAM Systems

Lead Software Engineer

Kyiv, Ukraine

September 2017 – Present

Global IT services and software engineering company with 30,000+ professionals across 50+ countries.

- Led AI-assisted engineering adoption across the 20-person delivery team in 2025–2026, standardizing Claude Code, GitHub Copilot, and Cursor for code generation, review, and test scaffolding—accelerating delivery on recurring Drupal and React work while maintaining code-quality gates.
- Earned Microsoft Azure AI Engineer Associate (AI-102) and Anthropic Claude Certified Architect (2025–2026), applying generative and agentic AI patterns—MCP, subagents, agent skills, and prompt engineering—to developer workflows and internal tooling.
- Leading development of a Drupal 8–11 multi-site platform for a multinational healthcare company, managing a 20-person dev team within a 47-member delivery team; accountable for architecture decisions, release quality, and cross-team coordination.
- Built and maintained a React/Next.js-based Design System using Figma, Storybook, and Style Dictionary, applying atomic design principles and design tokens to create a shared component library across the multi-site estate.
- Established CI/CD pipelines via Travis CI and GitHub Actions; standardized local development with Docksal and Docker Compose, reducing environment drift and onboarding time.
- Owned deployment pipelines and Drupal/PHP application update cycles across multi-site environments, achieving zero-downtime releases and reducing regression incidents by ~30% through Capistrano automation.
- Introduced PHPUnit test coverage and PHP Code Sniffer enforcement, raising core-module unit test coverage to 80%+ and reducing regression incidents across release cycles.
- Role progression: Software Developer (Sep 2017 – Jun 2019) → Software Engineer (Jun 2019 – Sep 2021) → Senior Software Engineer (Sep 2021 – Jun 2022) → Lead Software Engineer (Jun 2022 – Present).

[empty] Studio

Technical Director

Ukraine

June 2011 – June 2017

Software development studio delivering websites, e-commerce platforms, corporate portals, and technical services for SMB clients.

- Led full-stack delivery of 50+ web projects across e-commerce, corporate, and media verticals—averaging 8–10 concurrent active client engagements across PHP, Bitrix, WordPress, OpenCart, and PrestaShop stacks.
- Performed proactive security incident response across 10+ compromised client sites: malware removal, vulnerability identification and remediation, and full restoration of production environments.
- Architected and shipped 20+ CMS modules, plugins, and API integrations; ran SEO optimization and coordinated a team of 2–4 junior engineers, reducing delivery time on recurring project types by ~20%.

PROJECTS

- Clica.ru / Founder & Software Developer**
2009–2010. Software startup; founded and developed the platform as sole technical lead.

LLC "RK" Remote
Full-stack Developer December 2014 – August 2017
Online store of goods for e-sports.

- Delivered adaptive design layouts, custom modules, and database migrations on OpenCart/PHP for an e-sports e-commerce platform; integrated payment systems, hosting administration, and SEO improvements.

buyincoins.biz.ua Ukraine
Senior Software Developer November 2010 – December 2013

- Built and maintained PHP-backed e-commerce features, MySQL schemas, and hosting/system reliability; owned content management, price synchronization, and website promotion.

SE "SPI Krivbassproekt" Kryvyi Rih, Ukraine
Deputy Head of the Mining Department January 2001 – August 2017

- Designed mining plants for clients across multiple countries; coordinated with research, design, and equipment supplier institutes. Provided designer supervision over construction; drove energy-intensity reduction initiatives across industrial production design.

Freelance / BazarInfo Remote / Kryvyi Rih
PHP Web Developer / Software Developer March 2003 – May 2010

- Delivered PHP applications and CMS-driven client sites with emphasis on SEO-ready structure, clean MySQL data modeling, and maintainable code across multiple frameworks.

EDUCATION

Kryvyi Rih National University Kryvyi Rih, Ukraine
Master of Mining (Underground Mining of Mineral Deposits) — Faculty of Mining and Metallurgy 1997 – 2006

Self-directed study Ukraine
Web applications development (Master-level self-education) 2000 – 2006

1C Bitrix Academy Certification program
Bitrix Framework Developer Master 2014
